🎯 Career Objective

Passionate and dedicated Computer Science student with strong backend development skills and a drive for crafting robust and scalable systems. Seeking to contribute to impactful projects in a challenging remote position where I can leverage my knowledge of Python and Django, while continuously growing through hands-on learning and system design.

🎓 Education

B.Sc. in Computer Science and Engineering

International Islamic University Chittagong (IIUC)

Duration: 2023 – Present

💻 Technical Skills

Languages: Python, C, C++

Frameworks & Libraries: QT, Django

Database: MySQL

Tools & Technologies: Git, GitHub, HTML, CSS, Tailwind, JavaScript (Basic)

Others: Project Deployment

📚 Certifications

Python Django Basics – Completed a 4-hour introductory course on Django backend development (March 24, 2025)

🌐 Languages

Bangla: Native proficiency

English: Medium proficiency

🧠 Competitive Programming & Problem Solving

Codeforces: 225+ problems solved

🏆 Projects (9 Projects Total)

TO-DO Application
🔗 **https://github.com/MIZBAHULALIMINHAZ/TO_DO**

A full-featured task management system with daily, monthly, yearly planning, progress tracking, OTP verification, individual registration, login and a mobile-responsive UI .

Brainer – Personal Planning App
🔗 **https://github.com/MIZBAHULALIMINHAZ/Brainer**

Helps users break down long-term goals into structured tasks and game with productivity workflows.

IIUC Shuttle Management System
🔗 **https://github.com/MIZBAHULALIMINHAZ/IIUC-Shuttle-Management**

Manages university shuttle transport with booking system and admin schedule management.

Canteen Management System
🔗 **https://github.com/MIZBAHULALIMINHAZ/Canteen-Management-System**

Terminal-based C app for menu display, order processing, and billing.

Flight Management System
🔗 **https://github.com/MIZBAHULALIMINHAZ/Flight-Management-System**

GUI-based flight booking and admin scheduling system .

Task Management System
🔗 **https://github.com/MIZBAHULALIMINHAZ/Task-Management-System**

Terminal-based C++ task tracker to manage tasks and deadlines.

MediConsult (Ongoing)
🔗 **https://github.com/MIZBAHULALIMINHAZ/MediConsult**

Healthcare platform for doctor-patient interaction and appointment booking.

Dinkart – Smart E-commerce System (Ongoing)
🔗 **https://github.com/MIZBAHULALIMINHAZ/Dinkart**

A feature-rich online shopping platform under development that integrates smart product listings, user authentication, order tracking, and admin dashboard. Designed to streamline customer purchases and seller product management. Future integrations include payment gateway, live order status, and personalized recommendations. Built with Django and scalable backend architecture.

✳ Interests

Backend System Design

Web App Development

Solving real-life problems with code
